IUSSP, established in 1928, is the largest international association of population specialists. With over 1,800 members from 140 countries, the IUSSP brings together researchers, policymakers and others from diverse disciplinary backgrounds to address key issues concerning population and sustainable development.

Australian Population Association (APA) is the national supporting organisation of IPC2025. The APA was formed in 1980 and is Australia's leading professional association for demographers. The APA's aims are: to encourage the exchange of information between individuals and organisations in population and related fields; to provide a forum for the discussion of population issues; and, to promote population research and education, particularly in Australia and the Asia-Pacific region.

For details on the conference, visit the Conference website at <https://ipc2025.iussp.org/> or send an email to ipc2025@iussp.org.

ABOUT THE CONFERENCE

The **IUSSP International Population Conference is the world's largest international scientific conference on population issues**. First organised in 1927 and held every four years since 1959, the conference brings together over **2,000 scientists, policymakers and practitioners from around the globe** to present and discuss the latest research on contemporary population and development issues.

At the invitation of the Australian Population Association, the **30th International Population Conference (IPC2025) will take place in Brisbane, Australia** at the Brisbane Convention and Exhibition Centre (BCEC) from 13 to 18 July 2025. IPC 2025 will be an in-person conference.

The **Conference will include over 800 oral presentations and up to 1,000 posters selected from research submitted to the Call for Papers**. There will also be plenary sessions, debates and invited panel discussions featuring leading experts in the field, as well as training workshops, exhibits and side meetings occurring both before and during the Conference.

The Conference is open to all members of the population community and those interested in population matters working in research, teaching, governmental and non-governmental organisations, as well as the private sector including publishing companies and the media.

Institutions working in the population field are encouraged to organise exhibits, side meetings, training workshops, or sponsored research leader sessions.

All researchers and population specialists are warmly invited to submit paper or poster proposals and to plan on attending this event. Presentations in oral and poster sessions will be selected through a peer-review submission process.

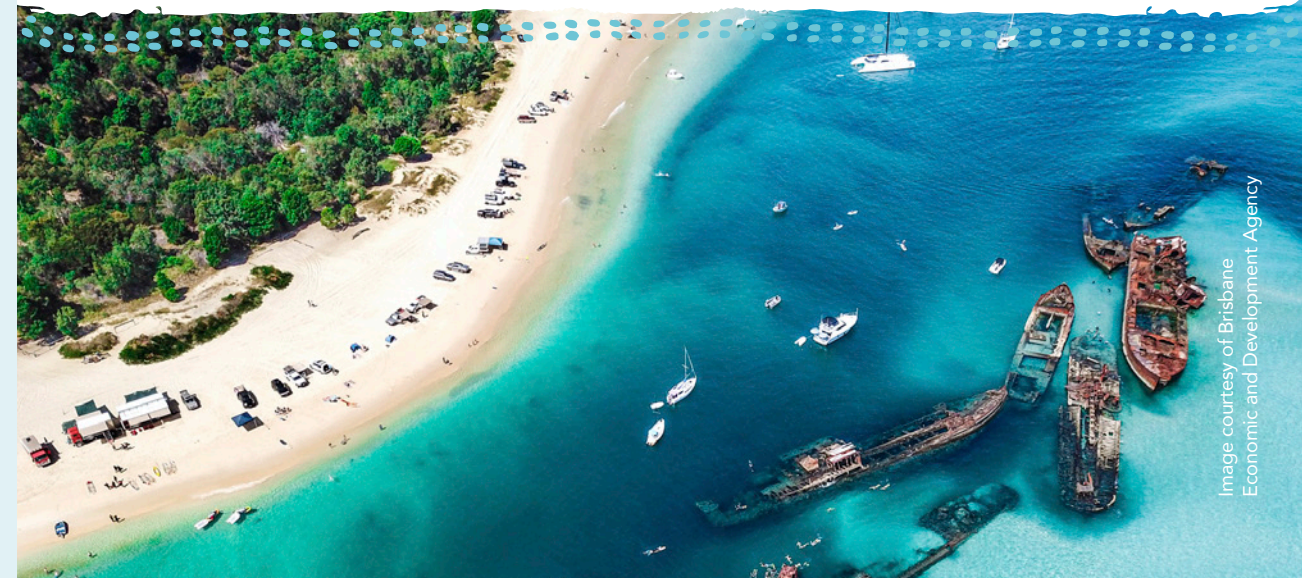

SCIENTIFIC PROGRAMME

The scientific programme of the Conference will be created from abstracts submitted to the Call for Papers by the submission deadline of **15 September 2024**. **All abstracts must be submitted online via the IPC2025 website**, which is scheduled to open for submissions on **1 May 2024**. **Always** check the IPC2025 Conference website <https://ipc2025.iussp.org/> for updates.

Authors can submit to one of the 24 conference themes or one of the 72 member-organized session topics listed below. All submissions will be reviewed by 2 anonymous experts on the topic area. Theme Conveners and Session Organisers will select abstracts for inclusion in the programme based on reviews and relevance and appropriateness of the communication for the session.

IPC 2025 will be an **in-person conference**. Authors whose papers are accepted on the programme will be expected to register for and attend the conference in Brisbane, Australia 13-18 July 2025.

INSTRUCTIONS FOR SUBMITTING A PAPER OR POSTER

- 1.** Only one submission as presenting author will be allowed in the Call for Papers for IPC 2025. Abstract submitters may however be listed as co-authors on other submissions. The one-abstract limit is to encourage individuals to submit their best work and keep the work of reviewing and selecting submissions manageable for the reviewers, session organisers and theme conveners.
- 2.** Authors should submit **both a short abstract (200 words) and an extended abstract (2-4 pages, including tables)** describing the topic, theoretical focus, data, research methods, and expected findings. The extended abstract must be uploaded to the conference submission website.
- 3.** The submitting author should provide the **full names, affiliations and email addresses of all co-authors** listed on the submission and indicate which author will most likely present the paper at the conference. This information can be changed later. **Only one appearance as a presenting author of a paper or poster will be allowed.**
- 4.** Abstracts should be submitted **to either a theme topic or a session topic**. Those submitting a paper to a session topic can indicate a theme that is most relevant to the paper in case the paper is not included in the member-organised session so that it can be considered for inclusion in a theme session.
- 5.** **Poster sessions:** Authors who only want to present a poster should submit to a **theme and select "poster session"**. All papers submitted to a theme or member-organised session that are not selected for a regular oral session will be considered for a poster session.

- 6.** All submissions will be **reviewed by 2 anonymous reviewers** before they are considered for inclusion in a session by a session organiser or a theme convener.
- 7.** To allow as many colleagues as possible to present their work at IPC 2025, **only one appearance as presenting author of a paper or a poster in the regular programme** will be allowed. A presenter can however also serve as a session chair or discussant. Co-author roles will not be counted towards the one-appearance rule, nor will roles as an invited speaker in a Research Leader or invited session, including a Plenary session.
- 8.** The **presenting author must register for the conference and pay the registration fee by 1 April 2025 to hold the paper on the programme**. An individual registration fee will cover **only one** oral or poster presentation.

All participants are expected to register online and pay the registration fee by credit card, check or bank transfer to confirm their participation in the conference. The IUSSP offers discounts to IUSSP members and student associates in good standing. Visit the Conference website for details.

ABOUT THE VENUE

IPC 2025 will convene at the Brisbane Convention and Exhibit Centre (BCEC). Consistently rated among the world's top three convention centres, it is a state-of-the-art conference facility with EarthCheck Gold Certification for its compliance with the highest environmental standards and its support of social and environmental sustainability. BCEC is located on the banks of the Brisbane River, denoted by our conference logo artwork. Australia's third-largest city has a thriving city centre and a subtropical climate with 240 days of sunshine every year.

Brisbane enjoys an alfresco lifestyle focused around the dining and entertainment precinct nestled along the river, all easily accessible on foot. This unique urban area, in a city of some 2.2 million inhabitants, includes extensive green space, swimming lagoons, cafes, bars and restaurants, as well as Australia's largest Gallery of Modern Art, the city's performing arts centre and museums.

Brisbane is also home to a number of tertiary institutions, including the University of Queensland where pre-conference training workshops will be offered.

For those extending their visit to the city, or Australia, Brisbane also offers easy access to unique nature experiences, with Moreton Bay's pristine white sand islands and World Heritage-listed Gondwana rainforests on the city's doorstep. Located between Australia's Sunshine and Gold coasts, where Australia's winters are mild, Brisbane is also a great place to launch a trip to the Great Barrier Reef and other destinations.

ABOUT OUR LOGO

The IPC2025 logo artwork was created by local Meanjin Aboriginal artist, Breanna Buttonshore.

The design incorporates the Brisbane river of Meanjin. The river, or brown snake, plays a key role in both the Turrbal and Jagera cultures of Meanjin. The conference logo also features a central meeting place and the footsteps of travellers from locations far and wide leading to the group of people meeting.
